Microsoft 365

Streamline healthcare endpoint management

We simplify and optimize your healthcare endpoint estate, enhancing IT efficiency and productivity for clinicians.

As a healthcare organization navigating the transition to hybrid work and adapting to the changing threat landscape, it's crucial to establish a **robust endpoint management strategy to safeguard valuable resources and data on all devices**. Rest assured, as your trusted technology partner, we are here to provide the support and solutions you need.

1 Workers have adopted new habits but still demand exceptional experiences

87% of employees offered flexible work options use them, working remotely at least three days per week.[1]

66% of business and technology professionals said enabling a hybrid or "anywhere work" environment is a high priority during the next 12 months.[2]

Organizations are making long-term decisions about where their people will work, but **only 35% of workers are satisfied with their company's approach**.[3]

2 Growing security risks continue to challenge IT admin teams

86% of security leaders agree that **outdated PC hardware leaves organizations more vulnerable.**[4]

Healthcare had the highest average data breach cost of any industry – for the 12th year in a row.[5]

3 In the increasingly complex security landscape, organizations turn to third-parties to help manage gaps

82% of executives say **IT complexity is an impediment to success.**[6]

With Microsoft 365 E3, your healthcare organization can streamline and oversee all digital endpoints using a unified solution.

Get visibility, recommendations, and data that allow you to act.

Streamline endpoint management
Manage organization-owned and BYO devices

Deliver the best experience

Manage and protect any endpoint from the cloud

Simplify and optimize value chain device protection to improve IT efficiency

Elevate the user experience

Keep design IP and production collaboration protected through hardware & software security designed to work together.

Reduce disruptions with unobtrusive IT features and experiences to help employees stay focused.

Upgrade to Windows 11 with over 99% app capability and App Assure.

Embrace inclusivity with enhanced accessibility, including system-wide live captions & natural voice access.
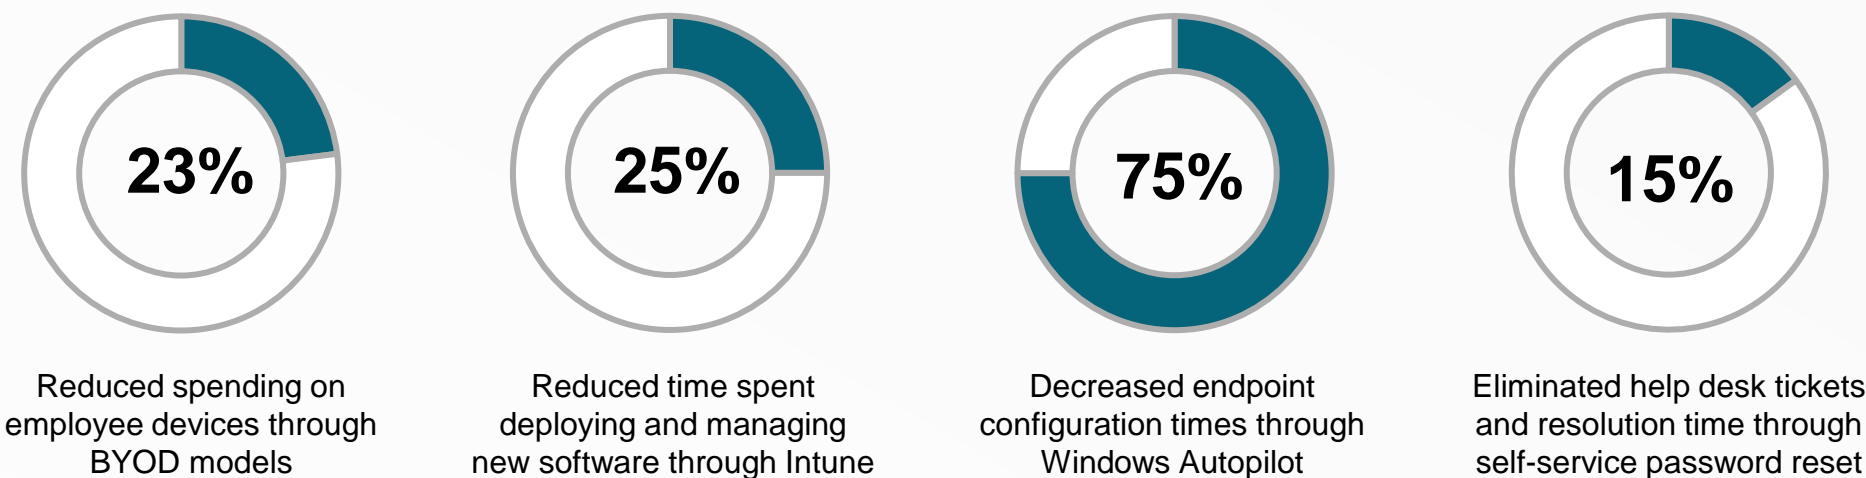

Manage and protect any endpoint from the cloud

Manage Devices with a single solution providing transparent access and marketing, sales, and design recommendations.

Get on-by-default security that complies with Zero Trust requirements and automatic updates to Windows and Microsoft 365.

Build endpoint compliance with modern servicing of Windows devices.

Set risk-based conditional access and app-based conditions policies.

Simplify and optimize your healthcare endpoint estate to improve IT efficiency

Deliver organization-branded messages to clinicians on various surfaces across Windows to share targeted information.

Eliminate print servers on premises and give clinicians an easier alternative than installing printer drivers on endpoints.

Detect and proactively remediate issues before they impact clinician experiences.

Total Economic Impact

23% Reduced spending on employee devices through BYOD models

25% Reduced time spent deploying and managing new software through Intune

75% Decreased endpoint configuration times through Windows Autopilot

15% Eliminated help desk tickets and resolution time through self-service password reset

Forrester Consulting, "The Total Economic Impact™ of Microsoft 365 E3," commissioned by Microsoft, October 2022.

Unleash the full potential of your Microsoft products with our value-added services.

Our expertise lies in streamlining endpoint management, delivering the best experience, and ensuring the security and protection of every endpoint through cloud-based solutions.
